

LESSMANN®
THE GERMAN BRUSH COMPANY

Catalogue **18**
Edition

 **QUALITY MADE IN GERMANY**

4 - 7 Information

8 - 13 Technology, Material and Safety

14 - 39 Wheel Brushes

Knot Wheel Brushes, Joint Cleaning Brushes, Pipeline Brushes, Single Segment Brushes, Wheel Brushes, Special Wheel brushes, Accessories

40 - 49 Deburring Brushes

Deburring Brushes, Roller Brushes, Deburring End Brushes

50 - 61 Cup and Bevel Brushes

Cup Brushes, Bevel Brushes, Brushes for grass trimmers

62 - 77 Shank Brushes

Shank Wheel Brushes, Cup Brushes with Shank, End Brushes, Miniature Brushes

78 - 95 Hand Brushes and Brooms

Standard Hand Brushes, Spark Plug Brushes, Fine Scratch Brushes, Special Models, Brooms and Scrubs, Dusters, Weed Brushes and Brooms

96 - 117 Interior Brushes

Mikro Interior Brushes, Cylinder Brushes, Sleeve Brushes, Stove Pipe Brushes, Boiler Brushes, Fitting Brushes, Brushes and Scratchers

118 - 127 DIY Brushes and Sales Promotion

Do It Yourself Brushes, Packaging and Presentation, Sales Promotion

128 - 143 Industrial Brushes

Brushes with carbon fibre, Disc Brushes, Lath Brushes, Wheel and Roller Brushes, Strip Brushes

Dear customers,
dear interested parties,

for 70 years, the name LESSMANN stands for a medium-size family business with high-quality surface finishing tools "Made in Germany". We thank our partners and valued customers for your support! Through seven decades of experience we are able to provide you with the highest quality and innovative products. The latest knowledge and ideas are combined in-house and implemented to first-class products for our customers worldwide.

Retailers receive a wide assortment of **standard goods** for fair market value. **Industrial customers** may expect **custom-made products** which agree upon the special demands in their production processes. Permanent product improvements, working with innovative raw materials and being willing to break through technical limits this again and again bring us new possibilities to create the best solutions for you.

New additions to the **catalog range** include brushes with carbon fibre (see page 130), high performance filament brushes (see page 132) and knot bevel brushes with shank (see page 68). You can also find the newly designed cut cases for optimal presentation of the brushes on the shelf (see page 123).

We are pleased to serve our US customers through our subsidiary in Houston, Texas founded in June 2016. 70 years of competence and know-how go from Oettingen/Bavaria to the United States and bring many solutions for individual applications.

Last year we also invested at our Oettingen site and expanded capacities, we schedule delivery dates even more precisely and produce and operate even more efficiently.

Steady service, fast response, selected suppliers and a constantly growing know-how of our qualified and committed employees – with these values we also would like to be in future your professional partner for technical brushes as "THE GERMAN BRUSH COMPANY".

For the achievements and decisions we stand with our name.

Lessmann
Jürgen Lessmann

D. Lessmann
Dieter Lessmann

Quality, Fairness, Reliability

LESSMANN®

To do the right things to the right time: the success of our company nowadays is based on contributions and entrepreneurial decisions in the past. This day, we, as a family enterprise in the third generation, are facing new customer demands and market statuses, react flexible and work efficient, to gear our company up for the future!

Quality, Fairness and Reliability are the most important values in the relation to our customers and partners, since Johann LESSMANN and its children Edgar and Traudel founded a small brush factory in Oettingen.

Strict quality management, uncompromising customer orientation and decades of experience make up the foundation of our success. One of the most important strengths are our 220 qualified and motivated employees, who are willing to get into new challenges, react flexible and to bring in their knowledge und competence. That's how we work together to have a mutual success.

Future-oriented investment

An important investment into the future is the construction of our new 4,200 sqm production hall in 2013: this step is a visible sign of our stable growth. We set another milestone in 2016 by the enlargement of our high rack storage area. These steps are a visible sign of our stable growth.

Besides the new building shows our intention to assure our position as leading technological and qualitative company and to strengthen it by opening new markets! Furthermore we have more space and capacities for producing more industrial special solutions – of course in our usual best quality and accuracy!

THE GERMAN **BRUSH** COMPANY

Made in Germany

Quality made in Germany. For LESSMANN that does not only mean, that all our products are manufactured in Bavaria, but also the huge part of all raw materials as filament, wood, metal or plastics are purchased from renowned suppliers in Germany.

We manufacture almost all products in a broad standard program on our own. That's why already the quality of the raw materials has a significant role. Intensive test of the materials and inspections during production, build up two important values of the reliable LESSMANN-quality.

The headquarters in Germany requesting us to be the pioneer when using modern technology and automation. Thus our customers can receive the best quality at competitive prices.

Perfect Service for Perfect Presentation

The brand LESSMANN signifies quality and gives clearly structured information.

Please have a look at our home page in the internet!

On www.lessmann.com you will find our latest catalogue as well as leaflets to download. Further technical advice as well as operating instructions are available.

Self-service Tool Bar Displays

Take advantage of our experience and use this idea that will lead to successful and increased sales.

Individual Solutions for special applications

Often technical brushes for very special applications are requested. Devarnishing surfaces or rounding burrs. Each application is different and a standard tool could not be used in each case.

Every day we develop new brushes for industrial demands. In the majority of the cases, the aim of the operator is to increase productivity. Our experienced consultants will help you to make the right choice and to find the appropriate design of the brushes for your individual needs.

Fit for the Globe

First-class quality products, expertise and a high flexibility – our innovative technical brushes are "Fit for the Globe".

Depending on the country we work with our own employees, regional importers or authorised retailers. Our export department has the accurate know-how, to consult and satisfy the demand of our customers globally.

In 2016 we launched a foreign branch in the USA located in Houston, Texas. The „LESSMANN Inc.“ guarantees optimal service and logistics and our approved first-class products on the American market.

"Simply the Best" by testing

Our own production of nearly all components of our standard programme and our own development of special articles enables us to have an excellent knowledge in both manufacturing quality and safety testing.

Creating Innovation, Exceeding Safety Standards, Keeping Top Quality

With this motivation we make complex development and product tests as an essential part of our work.

Material Tests

These are the first steps of our quality management: All deliveries of raw material are tested according to and above specification details. All wires are tested for their tensile strength and for their reverse bending strength by a fatigue measuring process. Beside the quality of the material it is important that its attributes are as suitable as possible for their intended use.

Imbalance Test

An imbalance of machine driven brushes is not pleasant and is dangerous for the health of persons working at the machine. Although it is not necessary under the DIN or the EN Norms, we produce our brushes according to our own standards for minimum imbalance. By doing so our customers take advantage of smooth running fatigue reducing brushes. Our employees in production ensure that these high quality aspects are maintained.

Safety Tests

According to European safety norms all brushes have to with-stand 1.5 times of the mentioned maximum RPM. Naturally when developing a brush, we test every brush type for this safety aspect. Only if all tests are satisfactory, can the article be produced. During production many samples are taken of the brushes in order to check the required safety speed. Should a model or a raw material be changed we begin the tests again. For this very reason every customer can rely on a high quality and safe tool.

Lifetime and Power

For the measurement of the lifetime and power of technical brushes there are neither

norms nor standard procedures. After long developing processes and many tests we have found testing methods that simulate testing in real working conditions. On self built machines we are able to test the abrasion and thus the lifetime and power of machine driven brushes. Beside the quality aspect these tests are helpful in optimising materials used, as well as component parts and the construction of brushes. Even if in comparison tests with competitor brushes such testing has shown and proved the high quality of our products:

We keep on testing to guarantee customer satisfaction.

Quality is our feature!

Accredited with DIN EN ISO 9001

Recommendations for Safe Brush Use

LESSMANN Quality is Safe

We guarantee the best quality and long lifetime for our products. Our brushes are manufactured according to the existing standard EN 1083-2 and ANSI 165.1. All the relevant machine driven brushes are checked for occupational safety using a centrifugal force test.

Safety Information

All machine driven brushes require as with other rotary tools, that the required safety precautions are kept:

Safety for Your Body

All operators and other personnel in areas where rotary brushes are being used must wear safety goggles or face shields and protective clothing.

For your own safety:

Wear personal protective equipment

Brush Check

The brushes should be checked for damage before using.

A correct mounting is imperative.

Peripheral Speed

The max. RPM indicated in the catalogue are safety figures by which the brushes can be used without danger. Please do not exceed these figures under any circumstances! In most cases a lower RPM is sufficient to gain an optimal result.

Correct Pressure

The schedule shows the necessary motor drive power for different brush diameters. The brushes need only a light pressure while brushing because only the wire points are effective (please look at the schedule). A higher pressure does not improve the brushing effect. In fact the brush lifetime is reduced and greater power is needed. The indicated curves inform you about the expected power. The power ratings refer to a brush with 30 mm width.

Working with Shank Brushes

When working with shank brushes please note that the shank has to be inserted fully into the tool. This is especially necessary when working with high RPM, for example on straight grinders and pneumatic tools.

Mechanical Application

Only use the brush with the indicated maximal peripheral speed (RPM max.). The max. RPM only is allowed when the brush is clamped min. for 10 mm into the tool. When the brush is inserted into the suitable work piece, higher RPMs are possible. Only use the brush right rotating.

Correct

Incorrect

Machine usage:

These symbols in the chapters show on which machines the brushes usually are used.

Stationary equipment

Angle grinder

Straight grinder

Drilling machine

Grass trimmer

The performance figures mentioned above are only guidelines.
*Power requirements for a brush width = 30 mm

minimum bore size for wheel brushes according to DIN EN 1083	
Diameter of the brush in mm	Minimum diameter of bore in mm
50	4.6
75	6.5
100	10
150	13
200	16
250	20
300	20
350	32

Recommended use of brushes on angle grinders – the right combination

Common idle speed of angle grinders (WS)	Brush diameter	60	65	75	80	90	100	115	125	150	178	200
Ø 115 11,000 RPM = WS 1	Knot Wheel Brush						WS 1	WS 1	WS 2	WS 3	WS 4	WS 5
Ø 125 11,000 RPM = WS 2	Cup Brush, Crimped Wire	WS 2		WS 2	WS 3		WS 3		WS 5	WS 5		
Ø 150 9,000 RPM = WS 3	Knot Cup Brush without Bridle		WS 1	WS 2	WS 2	WS 2	WS 3/4		WS 5			
Ø 180 8,500 RPM = WS 4	Knot Cup Brush with Bridle				WS 3/4		WS 3/4		WS 5			
Ø 230 6,500 RPM = WS 5	Knot Bevel Brush						WS 1					
	Knot Bevel Brush						WS 1	WS 1				

Warning: Before each operation please compare the idle speed of the angle grinder with the max. peripheral speed of the brush!

Producing Quality – brushing the correct way

Optimise Brush Results

The brush diameter and filling length are most important for the perfect brushing result. It is therefore very easy to eliminate almost all bad brushing results:

Brushing effect too weak:

- Increase the peripheral speed by increasing the brush diameter or the operating speed, but never exceed the maximum RPM rating.
- Use a brush with shorter trim length.
- Use a brush with larger wire diameter.

Brushing effect too powerful:

- Reduce the peripheral speed by reducing the brush diameter or the operating speed.
- Use a brush with longer trim length.
- Use a brush with smaller wire diameter.

Brush transfers burr:

- Use a brush with shorter trim length.
- Examine brush and work piece position.
- Use a brush with wider face.
- Use a brush with thicker wire diameter.

Information for brushing on stainless steel materials you find at www.lessmann.com

Note: you are welcome to contact our technical contact persons.

Recommended Peripheral Speed for Brushing Application								
Application	Peripheral Speed in m/s							
	15	20	25	30	35	40	45	50
With Filaments								
Removing Burrs				25 - 35				
Cleaning Welds						35 - 45		
Removing Scale						35 - 45		
Polishing					30 - 40			
Working on Plastic	15 - 20							
With Abrasive Filaments								
Dry conditions	16 - 18							
Wet conditions			25 - 30					

Conversion mm in Inches and I.S.W.G.		
Brush diameter

300	12"	
350	14"	

Peripheral Speed v in m/sec. (please follow the max. rotary speed of the brush!)									
n [1/min.] (RPM)	Brush diameter d in mm/inches								
	50 2"	80 3"	100 4"	125 5"	150 6"	200 8"	250 10"	300 12"	
1,000		4.2	5.2	6.5	7.9	10.5	13.1	15.7	
1,500	3.9	6.3	7.9	9.8	11.8	15.7	19.6	23.6	
2,000	5.2	8.4	10.5	13.1	15.7	20.9	26.2	31.4	
2,500	6.5	10.5	13.1	16.4	19.6	26.2	32.7	39.3	
3,000	7.9	12.6	15.7	19.6	23.6	31.4	39.3	47.1	
3,500	9.2	14.7	18.3	22.9	27.5	36.7	45.8	55.0	
4,000	10.5	16.8	20.9	26.2	31.4	41.9	52.4	62.8	
5,000	13.1	20.9	26.2	32.7	39.3	52.4	65.4	78.5	
6,000	15.7	25.1	31.4	39.3	47.1	62.8	78.5		
8,000	20.9	33.5	41.9	52.4	62.8	83.8			
10,000	26.2	41.9	52.4	65.4	78.5				
12,500	32.7	52.4	65.4	81.8					
15,000	39.3	62.8	78.5						
20,000	52.4	83.8							
25,000	65.4								
Peripheral Speed v = $\frac{\text{Brush diameter (d)} \times \pi \times \text{Peripheral Speed (n)}}{1,000 \times 60}$									

For working in wet condition we recommend PA 6.12 as base. Please state on your order! Since the upcoming heat on wet applications is conducted, the peripheral speed can be set much higher than on dry applications.

Brush filling materials and the characteristics

STA Steel Wire straight / crimped
is developed in co-operation with wire producers, so that it meets our special requirements. This wire is alloyed with manganese in order to increase its toughness. Result is higher tensile strength and longer lifetime of LESSMANN-Brushes.

STH Steel Wire High Tensile straight / crimped
is most often used in Knotted Brushes, Deburring Brushes and Pipeline Brushes. Furthermore we offer this high tensile wire in our complete assortment. Above all it features through its tensile strength and high fatigue rates, what results in lifetime even for extreme brushing applications.

STM Brass Coated Steel Wire
For long lifetime plus high tensile strength and cutting performance. Best results in brushing and deburring applications.

STL Cord Wire
Brass coated steel wire corded. Longest lifetime for heavy duty brush applications e. g. deburring.

ROF / RO4 / ROL / R08 Stainless Steel Wire
ROF must be used when working on stainless steel. Material number (WNR.) **1.4301 (AISI 304)**. This wire is resistant against corrosion and certain acids and bleaches.
RO4 Premium-quality stainless steel wire. WNR. **1.4401 (AISI 316)**
R08 High heat resistant stainless steel wire. WNR. **1.4860**.
ROL Stainless Steel Wire with cord construction WNR. **1.4310**

ROH Stainless Steel Wire High Tensile
This wire is characterized by a high tensile strength 2100 – 2500 and a long lifetime even in extreme applications. WNR. **1.4310 (AISI 301)**.

Further information on brushing on stainless steel materials you find at www.lessmann.com

MES Brass Wire (CuZn)
is softer than steel wire. Among other applications brass wire is suitable for working with mild bleaches. It's mainly used for processing of nonferrous metals.

straight / crimped / knotted: Metal wires for brushes can be processed in brushes straight, crimped or knotted. Wire knots are always made with straight wires. Compared to a straight wire with the same diameter the wire knots are much stronger than the single wire. Crimped wires brace each other and therefore achieve a better stability in the brushes.

Brush filling materials and the characteristics

BRO Bronze Wire (CuSn)
is used for surface processing of wood and metal. It's also used when low-sparking brushes are needed.

NSI Nickel Silver (CuNi)
is used for polishing work pieces e. g. parts of nickel silver or brass, as it is softer than steel wire.

PP, PA, PE Synthetic Filaments
are resistant to abrasion and flexible. Despite minor resistance against heat these filaments are perfect for cleaning, grinding or surface processing of metal, plastic or wood.
Available are:
• Polypropylen (PP)
• Polyamid (PA) - PA 6, PA 6.6, PA 6.12
• Polyethylen (PE)

FIB Fibre
consists of heat resistant plant fibre, is slightly abrasive and therefore can be used for smooth grinding, above all for working on wooden surfaces. Moreover fibre is used for general cleaning and polishing work.

ROS Horse Hair
is an animal hair, which above all is deployed in terms of light cleaning and dusting work. Horse hair is resistant against diluted acids and bleaches. It's not chargeable for static electricity.

Encapsulated Brushes
Encapsulated brushes are ideal for an aggressive work on working pieces and for a very exact working in edges and angles.
By embedding steel wire, stainless steel wire, brass coated wire or brass wire in tough plastic, the filling width always remains the same and early break of the wires can be prevented. It's the perfect tool for long lasting and safe working. The advantages when working with encapsulated brushes are longer lifetime and harder brush effect.
Furthermore the risk of injury declines when using encapsulated brushes.
However, it might be possible that the brush will leave marks on the work piece.

Abrasive Filaments
consist of polyamide bristles containing abrasive grits. This modern material is ideal for deburring work, fine surface finishing of plastic and metal parts as well as grinding, cleaning, polishing, and structuring of surfaces. With their flexible surface, brushes with abrasive filament align to the different shape of working pieces. Abrasive bristles also have grinding effects on the side, which makes them even more flexible to application possibilities. You can choose between grit (from K60 to K1000) composed of aluminium oxide (AO) and silicon carbide (SIC). Also diamond filament is available.

Normally 2 polyamide-types are used:
Polyamide PA 6:
• good bend recovery
• good abrasion resistance
• absorption of water to max. 10%

3 grits in silicon carbid

Polyamide PA 6.12 (ideal when working in wet surrounding):
• flexible and excellent bend recovery
• high abrasion resistance
• absorption of water to max. 3%

You can differ the bristles between round or flat bristles. Usually round bristles are used, because they are more flexible than flat bristles and very good for processing work pieces with strong shapes. Round bristles with a smaller diameter, less than 150 mm, are very efficient if you are not able to use flat material. However, flat bristles possess a high abrasive grit, represent a long durability and a high removal rate by a larger contact surface.

Grits to choose from:

Abrasive filaments SIC (filament K60 to K1000):
• intensive results when deburring
• for surficial improvement/-processing
• mainly for process stainless steel and aluminium limited
Common measurements: K 80/1,1, K 80/1,2, K 80/1,4, K 120/0,6, K 120/1,1, K 180/0,9, K 180/1,0, K 320/0,60, K 500/0,5

Abrasive filaments AO (filament K60 to K1000):
• less sharp-edged compared to SIC
• to the finish of soft metal
• to polishing and smoothing
• to process aluminium when smoothing or polishing
Common measurements: K 80/1,2, K 120/1,1, K 180/0,9, K 180/1,0, K 240/0,75, K 240/0,90, K 320/0,60, K 500/0,25, K 500/0,50, K 600/0,3 – others on request.

Diamonds filaments(filament K60 to K1000):
• for aggressive applications
• used for materials with high material strength
• self-renewing through independent sharpening

By ordering our standard grit, also with small quantities you receive short delivery times!
The chemical components of nylon please find at www.lessmann.com

Physical Characteristics

*The specified Tensile Strength is applicable for a wire strength 0.3 - 0.4 mm

Knot Wheel Brushes

Knot Wheel Brushes

Knot wheel brushes for grinders, angle grinders and stationary machines used in the preparation and reworking of bolt fillet and butt welds. They remove scale, rust, paint, slag, rubber residue and can be used for deburring.

All knots on our standard twisted wire wheel brushes are left hand twisted in order to minimize the undoing of the knots should the brush be used incorrectly. On request we can supply right hand twist brushes.

Knot Wheel Brushes with multiple Rows
Ready mounted brushes with multiple rows have a dense filling compared to single segment brushes, which are assembled together. In your order please state the width of the brush, bore size and type and thickness of wire.

We recommend to turn the brush during use in order to maintain sharpened wire ends.

On request other bores and wire diameter are available.

The listed knot wheel brushes are for the use in stationary machines.

Stainless Steel Brushes

LESSMANN-brushes with stainless steel have green side plates. We use wire with material number 1.4310. Material number 1.4401 can be used on request. Information on working on stainless steel you find at www.lessmann.com

Chunky packaging

Many articles you receive as standard in handy covering boxes with 10 pcs.

Item Nos. in **bold** are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

- STM** = brass coated steel, straight
- STH** = steel wire, high tensile, straight
- ROH** = stainless steel wire, high tensile, straight

Knot types ZF

- B:** Rose Bud
- O:** Open Knot (wire ends are cut)
- D:** Fully knotted (wire ends are cut completely)

Joint Cleaning Brushes

Joint cleaning brushes are used for the production of expansion joints in the construction of new linings as well as in restoration and reparation. The application of this knot wheel brush is usually alike with all pavements.

Brushes with brass coated steel wire STM are very stable, hence they are often used for cleaning concrete joints.

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

STA = steel wire, straight
STH = steel wire, high tensile, straight
STM = brass coated steel, straight
ROH = stainless steel wire, high tensile, straight

Pipeline Brushes / Stringer Bead Brushes

Pipeline-Brushes / Stringer Bead Brushes
LESSMANN-Pipelinebrushes are specially developed for professional use on U- and V-welds in the pipeline industry.

The remarkable features of the high quality LESSMANN Pipeline Brushes are the long lifetime and the quietness of running. They are especially narrow and therefore they are the perfect tool for cleaning all welds at tube connections.

Pipeline Brushes / Stringer Bead Brushes, left-right knotted

Left-right knotted pipeline brushes usually are more aggressive, hence they are often used for heavy brushing operations. Besides the knots open less, therefore there are ideal for the treatment of edges.

Stainless Steel Brushes

LESSMANN-brushes with stainless steel wire have green side plates. We use wire with material number 1.4310. Material number 1.4401 can be used on request. Information on working on stainless steel you find at www.lessmann.com

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

Pipeline Brushes / Stringer Bead Brushes with rose bud
Knotted brushes with rose bud have a longer life time. They are used for a professional treatment of weld seams in the tube and pipeline construction.

Pipeline Brushes / Stringer Bead Brushes, left-right knotted
Left-right knotted pipeline brushes usually are more aggressive, hence they are often used for heavy brushing operations. Besides the knots open less, therefore they are ideal for the treatment of edges.

Pipeline Brushes / Stringer Bead Brushes, encapsulated
With encapsulated pipeline brushes a very exact and precise working is possible. By embedding in tough plastic the filling width always remains the same and early break of the wires can be prevented. A working width of 6 mm still allows to reach U- and V- weld seams.

Item Nos. in bold are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

STH = steel wire, high tensile, straight
STM = brass coated steel, crimped
ROH = stainless steel wire, high tensile, straight

Single Segment Brushes

Single Segment Brushes

These brushes are mainly used for deburring purposes in stationary machines or processing centres. The construction of these brushes allows it to assemble them to roller brushes of any desired width. Many different filling materials like steel, stainless steel or abrasive nylon with various grit are at your disposal.

Outstanding Processing

The flexible bristles align to the different shapes of working pieces. An important advantage of the single segment brushes compared to other grinding tools, such as pads or grinding discs, is their gentle treatment. Furthermore the brushes do not become encrusted. They are suitable for deburring work and fine polishing of stainless steel, light metal or plastic material. Besides the executions listed on this page other diameters and grit sizes are available.

Laser imprint of brushes

For further information on abrasive filaments please see page 13.
Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).
SIC = silicon carbide bristles

Stainless Steel Brushes

LESSMANN-brushes with stainless steel wire have a laser imprint. Information on working on stainless steel you find at www.lessmann.com

For further information on abrasive filaments please see page 13.
Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).
STA = steel wire, crimped
STH = steel wire, high tensile, crimped
STL = cord wire, crimped
ROF = stainless steel wire, crimped

Wheel Brushes

Wheel Brushes

Wheel brushes filled with crimped wire are used for the purpose of obtaining different surface finishing:

- the removal of rust, paint and dirt
- for roughening, deburring, stripping or polishing.

Big or Small?

A decisive factor for choosing the most suitable brush is the wire and tube diameter. Brushes with a larger tube diameter (measure R) are filled with more wire, are more aggressive and have a longer life.

In our catalogue are the usual tube diameters – other diameters can also be supplied. More technical instruction such as peripheral speed etc. see pages 8 - 10.

The bore must be indicated in the order. Without any instruction delivery will be with standard bore "d Stand".

Stainless Steel Brushes

Information on working on stainless steel you find at www.lessmann.com

Other filling materials, filling diameters and special executions

Take advantage of the LESSMANN range of products, of the experience in developing and producing brushes! We are able to produce special executions on demand.

Plate with tube 80 and 100 (Set 4 / 5)

Item Nos. in bold are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

STA = steel wire, crimped

STM = brass coated steel, crimped

Adapter Set

All brushes are supplied with adapter sets for easy mounting on all popular grinding machines. The adapters have the following dimensions:

Set 1 / tube 30:
30 / 1" / 22,2 / 20 / 16 / 1/2" / 12

Set 2 / tube 40:
40 / 32 / 1" / 22,2 / 20 / 16 / 1/2"

Set 3 / tube 50:
50 / 32 / 1" / 22,2 / 20 / 16 / 1/2"

Set 4 / tube 80 + 100:
brushes with metal discs, bore 50.8 and double keyway 7x13; plus adapter to bore 30.

Set 5 / tube 80 + 100:
brushes with metal discs, bore 50.8 and double keyway 7x13; plus adapter to bore 32.

By usage without adapter set the actual size might be up to 0.2 mm below nominal size.

Brushes for the wood machining industry

Satin Brushes

Satin brushes are the perfect tool for satining, polishing, abrading/smoothing, matting and structuring.

Staple Set Wheel and Disc Brushes

Wheel and Disc Brushes with abrasive nylon filament are used for the wood machining industry. Used on angle grinders, the disc brushes are ideal for maintaining, cleaning, structuring or polishing wood.

Besides the brushes are used for giving wood a rustic effect or for roughening it before treating with colour or lacquer.

The brushes are very effective when working on large surfaces.

Band Saw Brushes

Wheel Brushes in circular saws or band saws are used for cleaning the chipping space. A wheel brush with diameter 80-100 mm is pressed against the saw blade (circular or band saw). By moving the saw blade or band the brush is rolling and it taking the chipping out of the shipping space. Hence a built-up edge is prevented and the durability of the saw blade extended. The used wheel brushes usually are with steel wire, corded wire or nylon filament. The brushes are suitable for all common machines.

Stripping Brushes

For the removal of laquer and other insulations from cables and electric equipment. The polished surface and the concentric running enable soft removal of laquer from the wires.

Item Nos. in **bold** are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

Special Models

Small diameter crimped wheels SDW
LESSMANN small diameter crimped wheels have a manifold use, e.g. for deburring, cleaning, derusting or paint stripping on various work pieces and surfaces. A typical application e.g. is the cleaning of interior and exterior threads or the treatment of areas which are hard to reach.
The brushes are inserted directly into the machine or are mounted into a drilling machine or fast-moving item with a suitable drive arbor. Depending on the application and requirements several brushes can be mounted in a row. Suitable adapters are available on request.
The typical filling material LESSMANN offers is steel wire, stainless steel wire or abrasive nylon. On request other wire diameters and filling materials are available. All brushes are manufactured with a copper shell.

Wheel Brushes for the treatment of hard metal
Wheel brushes with diamond filling are often used for the rounding of edges of carbide or diamond tools.
Cutting edges on carbide tools extend the lifetime and allow a higher cutting speed. The treatment on major cutting edges of drills are mainly operated manually. LESSMANN wheel brushes with diamond support to decrease abrasion and to improve the surface quality of the work piece. Due to the consistent and narrow filling a clean and steady dipping of the edges is possible.
Surfaces of chip flutes of carbide drills are finished with brushes with aluminum oxide filling material. Finished chip flutes have a better process stability when drilling.

Stainless Steel Brushes
Information on working on stainless steel you find at www.lessmann.com

Item Nos. in **bold** are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

Adapters
With these adapters the bore can be reduced to the required size.
The wheel brushes are supplied with adapter sets which makes it possible to mount the brushes on all popular grinding machines. The adapters have the following dimensions:

- Set 1 / tube 30
30 / 1" / 22,2 / 20 / 16 / 1/2" / 12
- Set 2 / tube 40:
40 / 32 / 1" / 22,2 / 20 / 16 / 1/2"
- Set 3 / tube 50:
50 / 32 / 1" / 22,2 / 20 / 16 / 1/2"
- Set 4 / tube 80 + 100:
brushes with metal discs, bore 50.8 and double keyway 7x13; plus adapter to bore 30. Further reduction possible with set 1.
- Set 5 / tube 80 + 100:
brushes with metal discs, bore 50.8 and double keyway 7x13; plus adapter to bore 32. Further reduction possible with set 1.

A technical advice and safety information leaflet is included.

The practical adapter sets can also be ordered separately.

Single plastic reducing rings in many different dimensions can be supplied ex stock.

Drive Arbors
For use on drilling machines.

Metal Discs
Brushes with tube diameter 80 and 100 mm are supplied with our standard metal plates made of steel. Occasionally these metal plates are also required for brushes with smaller tubes. The metal plates on this page are therefore also suitable for the brushes on page 29 - 31. Please indicate the required bore size on your order and note that normally two metal plates are required for one brush.

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

Deburring Brushes

Part before brushing

Part after brushing

Deburring Brushes

Specially developed wheel brushes for deburring. These are suitable for all common deburring machines. Although they are heavier than other brushes because of their dense filling, we exclude any imbalance by evenly arranged filling material and the testing of every brush. Filled with high-quality wire, these brushes have a longer service life.

All brushes are with double keyway. Please indicate the required bore.

On the following pages you will find the standard measurements. Special measurements are available on request.

Deburring Brushes with Cord Wire
STL / ROL

Deburring Brushes with cord wire are usually used for working on very hard materials. This wire construction gives the wires additional hold, hence the output of the brush is increased.

Encapsulated Deburring Brushes

Are ideal for an aggressive and very exact working. An early break of the wires can be prevented. Therefore the brush has a longer life time and a better durability.

Stainless Steel Brushes

LESSMANN brushes with stainless steel wire have green site plates. More information for brush applications on stainless materials you will find at www.lessmann.com

For more information about deburring please ask for our leaflet "Deburring with brushes".

Item Nos. in bold are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

Roller Brushes

Roller Brushes

Roller Brushes for the use in deburring machines. For Deburring e.g. cutting edges of tubes.
As filling material you can choose from steel and stainless steel wire, brass coated steel wire or cord wire. These brushes feature with their dense filling.

Roller Brushes

Deburring brushes are available with
D = 250 - 400 mm and
A = 55 - 700 mm

In your inquiry please indicate measure D, A and the bore e. g. 50.8 mm, 52.9 mm or 54.5 mm with double keyway 13 x 7 mm. Other bores up to 120 mm are available on demand.

Moreover we offer with our welded metal plate special collets for the roller brushes. Bores and keyways will be produced customized.

Note: Due to our advanced manufacturing technology it is possible to produce balanced roller brushes without balancing weights. Hence the brush has a steady run throughout its whole lifetime.

Function chart of a deburring machine with roller brushes

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

Other measurements and filling materials as well as collets in special measurements are available on request.

Deburring End Brushes

Deburring End Brushes

These brushes are perfect for deburring tubes, profiles or even plane surfaces. Deburring end brushes are used in a set of 8, 16 or 24 single end brushes integrated in one deburring device.

The metal bush fits all standard collets.

Stainless Steel

Information on working on stainless steel material you find at. www.lessmann.com

Item Nos. in bold are available ex stock.

Cup Brushes

Cup Brushes
Knot cup brushes are for heavy duty use: for the preparing of metal surfaces before painting, the removal of slag, rust, scale or concrete waste.
The brushes diameter 80/100/125 mm (Art. No. 484/486/487) have a **bridle** fitted for stability. The bridle can be removed after wear of the wire exposing a further 20 mm of useable wire!

We recommend the use of our brush with diameter 90 mm for small angle grinders. Compared to the common brush with diameter 65 mm this model has 50% more wire and it is really something special in the brush market!

Knot Cup Brushes with extra long filling
For the use on large areas and for a flexible cleaning and derusting of e.g. shipyards. For a use in angle grinders. Easy working also in areas which are hard to reach.

Cup Brushes, left-right knotted
Left-right knotted cup brushes usually are more aggressive, hence they are often used for heavy brushing operations. Besides the knots open less, therefore they are ideal for the treatment of edges.

Cup Brushes
Cup brushes with crimped wire are ideal for working on large surfaces with angle grinders. They can also be used for the removal of rust, paint, dirt or scale and for polishing.

Special Designs
The cup brushes can be delivered with different filling materials according to your requirements e.g. brushes with brass cups and brass wire for non-sparking applications.

For promoting sales all standard wheel brushes are packed individually for self display. They are also available in bulk.

Stainless Steel Brushes
LESSMANN brushes with stainless steel wire have green cups. More information for brush applications on stainless materials you will find at www.lessmann.com

Chunky packaging
Many articles you receive as standard in handy covering boxes (10 pieces per carton).

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

Cup Brushes with Straight Wire

They are used for deburring surfaces, mostly in machining centers. The brushes are available with steel wire, stainless steel wire, abrasive nylon or any other filament. Due to the straight cup the filament of the brush is less flaring out and more cone points of the bristles work on the surface. Please contact us for more information!

Item Nos. in bold are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

STA = steel wire, crimped

STH = steel wire, high tensile, straight

STM = brass coated steel, crimped

STL = cord wire, crimped

ROH = stainless steel wire, high tensile, straight

MES = brass wire, crimped

SIC = silicon carbide bristles

Bevel Brushes

Bevel Brushes

The special shape of these brushes enables the user to work in hard to reach places. The knots are left hand twisted to increase stability. For promoting sales all standard knot bevel brushes are packed individually for self display. These brushes are also available bulk packed.

Wheel Brushes with thread

Like bevel brushes, wheel brushes with a thread are ideal for working in areas which are hard to reach. Usually the brushes are used on angle grinders.

Other measurements and filling materials are available on request.

Stainless Steel Brushes

LESSMANN brushes with stainless steel wire have green cups. We use wire with material number 1.4310. Material number 1.4401 can be used on request. More information for brush applications on stainless materials you will find at www.lessmann.com

Bevel Brushes, left-right knotted

Left-right knotted bevel brushes usually are more aggressive, hence they are often used for heavy brushing operations. Besides the knots open less, therefore there are ideal for the treatment of edges.

Item Nos. in bold are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

Brushes for grass trimmers

Brushes for grass trimmers

Knotted brushes on grass trimmers are ideal for removing weeds on grass pavers, curb-stones, cobbled areas or other spots which are hard to reach. Those brushes clean larger areas like courtyards, terraces or longer alleys effortless and sustainable.

Besides, brushes are ecologically friendly and they remove weeds fast and effectively.

Attention: When working with brushes on grass trimmers, please be aware of stringent safety rules. Please take note of the data sheet we attach the brushes or have a look at www.lessmann.com.

Right adaption of the brush

Item Nos. in **bold** are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

The brushes are suitable for all common grass trimmer and brush cutter models. Possible special diameters or special bores are deliverable on demand.

Wheel Brushes with Shank

Wheel Brushes with Shank

The wheel brushes shown on these pages are manufactured with a mounted shank for professional use. Tight filling wire and balanced running make these brushes excellent tools.

Knotted Wheel Brushes with Shank

It does not matter if the brush has one or two rows, the brush is the perfect tool for removing underseal, rust deburring, roughening etc. For working in narrow places we recommend our brush 417.198.11, which is an especially narrow Brush.

Encapsulated Brushes

By embedding in tough plastic the filling width always remains the same and early break of the wires can be prevented. It's the perfect tool for long lasting and safe working. The colour on the picture can differ from the colour on the brush.

Wheel brushes with shank completely stainless steel

All the inner and outer parts of these brushes such as shanks, side plates, rings, etc. are made of stainless steel. Therefore these brushes are the perfect tool for working in damp and difficult places. These brushes do not have green side plates.

Structuring Brushes with Shank

These brushes are special brushes which can be used for wood grain surfaces.

Shank Brushes with Silicon Carbide Bristles

The high quality bristles with silicon carbide can be used for deburring, polishing and structuring of stainless steel, aluminium and plastic surfaces. Besides the articles mentioned on this page we can also supply other grits, diameters and widths.

Stainless Steel Brushes

LESSMANN brushes with stainless steel wire have green site plates. We use wire with material number 1.4310. Material number 1.4401. can be used on request. More information for brush applications on stainless materials you will find at www.lessmann.com

The brushes have a 6 mm shank. On demand the brushes can also be supplied with 1/4" shanks (USA execution).

Brushes with other diameters, filling widths and filling material are available on request.

Cup Shank Brushes

Cup Brushes with Shank
Ideal for working on medium and large areas.

Cup Shank Brushes with Plastic Cup
Cup Shank Brushes with Plastic Cup and stainless steel wire especially are used for applications on stainless steel materials. The plastic cup prevents contact with the working piece, therefore it protects from corrosion or other foreign particles.

Bevel Brushes with Shank
Due to the conical form these universal tools are ideal for notches, corners, grooves, inside edges and irregular surfaces. These professional brushes are suitable for drills and cordless screwdrivers as well for high-speed straight grinders and compressed-air drives.

Brushes with steel and stainless steel wire can be used at higher RPM and can therefore be used on electrical and air driven grinding machines. These models are known for their high density of filling material and therefore they have a very long lifetime.

The brushes with silicon carbide bristles can be used for deburring, polishing or structuring of stainless steel, aluminium and plastic surfaces.

Item Nos. in bold are available ex stock.

ROF	= stainless steel wire, crimped
SIC	= silicon carbide bristles

End Brushes with Shank

For cleaning and deburring in hard to reach areas, removal of paint, rubber excess, cleaning of moulds and castings. Also for working on edges and curves, and in the inside of the bores, etc. End brushes are also available in other shapes, spreaded or pointed.

These brushes are perfect for fast moving tools. On demand also with 1/4" shank available.

Special End Brushes, crimping

The special end brushes with narrow crimped wire are characterized by its dense filling. These brushes show a harder brushing effect than brushes with normal crimped wire (e.g. page 72 - 73). These brushes are also available with extra long shanks or different diameters.

Square End Brushes

This special tool enables e. g. cleaning of blind holes and processing of bottom and side surfaces in one step. It's perfect for cleaning and easy deburring applications, e. g. square bores. Other diameters available on demand.

Encapsulated Brushes

By embedding in tough plastic the filling width always remains the same and early break of the wires can be prevented. It's the perfect tool for long lasting and safe working. The advantages when working with encapsulated brushes are longer lifetime and harder brush effect. However, it might be possible that the brush will leave marks on the work piece.

Stainlessless Steel Brushes

Further information for brushing on stainless steel you will find on www.lessmann.com

Knot End Brushes

Knotted End Brushes with Shank

According to the RPM the brush will vary in dimension and enable the user to work in hard to reach areas such as drilled holes and recesses of all kinds.

The cups of the knot end brushes with stainless steel wire are coated with plastic to protect the stainless surface. Knotted end brushes with stainless steel wire are green characterized.

Further information on working on stainless steel you find at www.lessmann.com

Special End Brushes with Shank 6 Ø, one Knot

One-knotted End Brushes to render precise working possible.

End Brushes, filled with epoxy resin

End Brushes filled with epoxy resin are able to treat small, defined areas. The brushes are more aggressive and allow a precise handling, hence they are used e.g. for electrical cabinets or for treating mounting surfaces.

Item Nos. in bold are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

Miniature Brushes

Miniature Brushes

Miniature Brushes are used for polishing, cleaning, or deburring of small-area surfaces or small working pieces. Miniature brushes remove waste and scale from weld seams or soldering points. The brushes are used on metal surfaces, steel, aluminum, cast iron, plastics, stone or wood.

Typical fields of applications:

- Precision tools
- Fine mechanics
- Pneumatic and hydraulics
- Electronics parts, e.g. plates

Miniature Brushes are available in different types as wheel, cup and end brushes. The typical filling materials are steel wire, stainless steel wire, brass wire or abrasive bristles.

Stainless Steel Brushes

Information on working on stainless steel you find at www.lessmann.com

Please Note: Brushes with bristles or goat hair achieve an ideal brushing result by using polish.

Item Nos. in **bold** are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

All Brushes also available with shank Ø 2,34 and 3,17 mm.

Hand Brushes

Hand Brushes

Hand Brushes are used everywhere, in the metal industry, construction work, in the workshop. They are found in every tool box. The complete range contains all types of filling materials, from coarse steel to the finest brass wire. The handles are made of beech wood with two hanging holes.

LESSMANN Handbrushes are of superb quality and yet are economic due to a fully automated and efficient production facility. Using modern marking systems individual printing of brands and EAN Bar Codes can be made. This is done by burning stamps or tampon printing at low cost.

Brake Caliper Brushes ROKI

This brush has been manufactured in co-operation with the automobile industry. This brush is used for cleaning off clogged lining deposits when changing brake pad linings. Thus the brush is very slim with a heavy straight wire filling. Made in this way it prevents damage to sensitive brake areas during use. The brush 182.431 has to the top a sloping filling and is therefore extra hard. New is the two-components-handle with the latest ergonomical aspects. Because of the design and the ergonomic handle this brush is remarkably versatile to use.

Hand Brushes with Two-Components Handles

apply to other requirements of modern high quality tools with best ergonomics.

Rivet Brushes

The V shaped filling material enables the removal of slag and scale from normally hard to reach welds and fillet welds

Hand Brushes with Scraper

For painters and bricklayers in the construction industry. These brushes are ideal for scraping off dirt or cement splashes.

Hand Brushes, Heavy Duty

These models have a larger wooden handle and a longer and dense wire filling than our standard models.

Universal Wire Brushes

For many uses, especially in the Do It Yourself section.

Stainless Steel Brushes

Information on brushing on stainless materials you will find at www.lessmann.com

All standard hand brushes have a bar code stamp and LESSMANN-imprint.

We are accredited!

** Plastic body | For the food industry

Fine Scratch Brushes

Also called watchmaker and goldsmith brushes. The brushes have a very high density of filling wires and are available in different widths. These brushes are used among other things to apply solvents and other cleansing agents.

Special Brushes

The brushes were manufactured according to our customers' specification and show variations, which are possible through our flexible manufacturing procedures.

Special Models

Hand Brushes Rectangular and Violin
There are many filling wires in these stable universal brushes.

Hand Brushes with Bracket
The wooden body is pointed to the front end, the plastic bracket is nailed on. The model 140.901 has an adjustable stock board which enables an adjustment to brush firmness.

These special models are mainly ordered by our export customers.

Brushes for removing wet storage stain
Zinc coated surfaces are needed for corrosion protection. Often after the zinc coating of work parts, under wet conditions chemical reactions occur which cause wet storage stain. The special bronze wire allows the effective removal of white rust without smashing the zinc coating which has to be treated.

Radiator Brushes
This narrow, long shaped brush is ideal for hard to reach areas on heaters and radiators. The model 121.211 has a straight body, the other models have a curved body.

Staining Brushes
The treated wood is prepared with these staining brushes. By using fibre and bronze wire the brushes are insensitive against all normal chemical based solutions. The model 144.211 has an adjustable stock board which enables an adjustment to brush firmness. With the staining brushes 144.701 and 144.801 the surface after the staining process is polished by the leather insert strips. Any standing wood fibre is also smoothed.

File Cleaners
The brushes for cleaning wood and metal files are available in different sizes and with different file card. The file card is glued on to the wooden body.

File Card in Rolls
Various roughing-up tools can be manufactured with this material, which is also available in different sizes and filling materials. Available in meters or if required in single pieces.

Bricklayer's Brushes
For pre and retreatment of brickwork for painters and bricklayers. All models have a jute or plastic strap.

Plasterer's Brushes
These are for roughening and structuring of plaster. Body is made of beech wood, the steel pins are hardened.

Spiked Rollers
For use before the removal of wallpaper. The spiked roller perforates the paper allowing absorption of stripping solvent. The roller is of plastic with the steel pins obliquely arranged to ensure maximum efficiency in use. The handle can be made longer with customised telescopic handles. For safety the roller is supplied with a protective cover.

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

Brooms and Scrubs

Brooms and Scrubs

Brooms and Scrubs for the use in all industrial companies and craftsman's establishments.

The shown brooms and scrubs are the best selling models.

The brooms with flat steel wire 1.80 x 0.45 mm make the so called broom lines on cement floors thus receiving a rough surface.

Item Nos. in bold are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

Dusters

Dusters
Depending on the surrounding and application area, dusters are available in various models and with various filling materials. For coarse and light adherent dirt, dusters with wire filament are ideal.

Next to horse hair we offer dusters with coco filament as a good value alternative.

The duster with polypropylene filament (straight plastic fibre) can be cleaned easily and therefore other surfaces do not get dirty. Since the water absorption of polypropylene is very low, the duster can be used also under wet conditions.

Further models in special execution with different filling materials and trim length available.

Dusters custom-made
Beside the mentioned models we provide special models with filling material and trim length according to your requirements.

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

STA	= steel wire

Micro Interior Brushes

Interior brushes with zinc coated twisted wire and single spiral
Due to the filling of aluminium oxide or silicon carbide their usage is more flexible than with conventional interior brushes.

Interior brushes with abrasive filaments are usually used for deburring bores, cross bores, o-ring recesses and for polishing and cleaning small bores.

Due to the flexible surface of the bristles the interior brushes suit to the contour of the bore and areas which are hard to reach can be treated. Abrasive bristles also have grinding effects on the side. That allows a rounding of the edges also on cross bores.

Also brushes with **diamond** filling are available, that causes an even more aggressive surface of the brush.

Micro Interior Brushes, Steel Wire
Micro interior brushes with steel wire are used as thread brushes for descaling, deburring or cleaning:

- Cross corners
- Crossovers
- Tap holes
- Slots

The brushes can be used either manually or mechanically.

Please do not hesitate to contact us, we will also find for special applications a compatible solution. Due to a fully automated production, LESSMANN offers high quality to reasonable prices.

Mechanical Application

Only use the brush with the indicated maximal peripheral speed (RPM max.). The max. RPM only is allowed when the brush is clamped min. for 10 mm into the tool. When the brush is inserted into the suitable work piece, higher RPMs are possible. Only use the brush right rotating.

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).
AO = aluminium oxide bristles

Stainless Steel Brushes
Information on working on stainless steel you find at www.lessmann.com

Mikro Interior Brushes are also available with special contours, e.g. **layered cut**.

Please ask for our special leaflet „Interior Brushes“.

Cylinder Brushes

Cylinder Brushes

For manual cleaning and deburring of tubes, bores etc. Cylinder brushes are also available in other dimensions and materials. When ordering special sizes please mention full specification: total length, filling length, filling material, diameter and quantity.

Item Nos. in **bold** are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 139).

- STA = steel wire
- ROF = stainless steel wire
- MES = brass wire
- PA = polyamide

Cylinder brushes, flat filament

These flat brushes with fine, crimped steel wire are ideal for cleaning areas which are hard to reach. A typical application is removing isolation rests in channels of stators or electric motors.

Stainless Steel Brushes

Hole Cleaning Brushes

Those hole cleaning brushes have a wooden handle. Hence the brushes allow a very comfortable working in various application fields.

Typically the brushes are used in construction industry or handcraft business for cleaning bore holes or slots.

Besides, Hole Cleaning Brushes are ideal for cleaning threads or deburring cross holes.

The model 561.304 has the filling material conically cut.

Mechanical Application

Only use the brush with the indicated maximal peripheral speed (RPM max.). The max. RPM only is allowed when the brush is clamped min. for 10 mm into the tool. When the brush is inserted into the suitable work piece, higher RPMs are possible. Only use the brush right rotating.

Bore Hole Cleaning Brushes

These interior brushes are used in the mounting techniques. The brushes are ideal for cleaning bore holes in most different materials. Afterwards screws and anchors can be inserted easily in the bore hole.

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

STA = steel wire

ROF = stainless steel wire

MES = brass wire

Tube and Sleeve Brushes

Interior Brushes

These brushes are varied for many different uses: not only for cleaning of tubes, gratings, sleeves and cylinders. Interior brushes regulate current velocity in tubing systems. They are similar to the double spiral tube brushes for deburring cross drillings etc. On these pages are shown standard brushes, single spiral having two drilling wires and the double spiral having four.

Sleeve Brushes

Sleeve brushes have a double spiral and are particularly stable types of tube brushes whose trimming is cut to a conical point. Used in machines they are beneficial for cleaning the sleeves (internal threads) of containers, e.g. after galvanisation.

Mechanical Application

Only use the brush with the indicated maximal peripheral speed (RPM max.). The max. RPM only is allowed when the brush is clamped min. for 10 mm into the tool. When the brush is inserted into the suitable work piece, higher RPMs are possible. Only use the brush right rotating.

Brushes with doublespiral

Brushes with a double spiral are mainly used for the treatment of larger diameters or for the treatment of hard materials. A double spiral is more stable and has a higher resistance against untwisting. Hence the brushes can be exposed to higher loads.

Stainless Steel Brushes

Information on working on stainless steel you find at www.lessmann.com

Special diameters
Minimum order € 125.00
Extra charge: Gross per piece
10 - 49 pcs + 50 %
50 - 99 pcs + 25 %
100 pcs and more + 10 %

Special threads under reserve
Extra charge: Gross per piece
10 - 19 pcs + € 5.00
20 - 49 pcs + € 4.00
50 - 99 pcs + € 3.00
100 pcs and more + € 2.00

For all brushes with thread M 6, M 10, W 1/2" and W 3/8" a practical hanger assembly is available for presenting the brushes individually. More information you find on page 125.

Suitable thread adapter,

see on page 115

Handles and Extension Pieces

see on page 115

On request tube brushes are also available with other measurements, other filling materials or other threads.

Item Nos. in bold are available ex stock.

Boiler Brushes / Stove Pipe Brushes

Boiler Brushes

The systematic care of boilers and regular cleaning by brushing increases the boiler efficiency and reduces toxic emissions.

LESSMANN boiler brushes are of outstanding quality made using the best materials and precise manufacturing procedures. Our current programme includes brushes in standard dimensions and special executions. As OEM supplier to important boiler manufacturers we are able to produce large quantities in an efficient way. What is even more important is our know how in meeting the critical tolerances demanded by our customers.

Stove Pipe Brushes

The stove pipe brushes are available in two different executions: with twisted handle (brush and handle one part) or with thread nipple, for screwing and lengthing by using a separate handle.

Handles and Extension Pieces

For tube brushes, boiler brushes and stove pipe brushes, see pages 107 - 109, 111 - 114. The twisted handles have an internal thread and a grip loop, the extension pieces have both an internal thread and an external thread.

Suitable Thread Adapters
see page 115

Item Nos. in bold are available ex stock.

Fitting Brushes

With designed two-components handle
For the inner cleaning in tubes in gas, water
and climatic conditions. We use only stainless
steel wire as the filling material for these
brushes. This prevents long-term damage by
material deposit in tubes.

Fitting Brush Set

A case of artificial leather that contains the
most frequently needed interior and exterior
brushes.

Recommendation for users: When using
interior fitting brushes, please only use brush-
es with stainless steel wire. This will avoid pit-
ting by the use of rusting wire parts.

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed*
article numbers (see page 148).

* conical filling

Battery Terminal Brushes

For cleaning of battery terminals. The twisted
brush is conical filled for cleaning connection
terminals of the battery cable. To clean the
battery terminals use the ringshaped filed
cards stuck in the handle.

Soldering Fluid Brushes

The handle is made of tinned metal.

Soluble Oil Brushes

With twisted wire handle for workshop use.

Do It Yourself Brushes

D.I.Y Brushes with Shank

Do It Yourself brushes are an excellent alternative to the professional tools previously shown in this catalogue. Available are cup brushes from diameter 50 - 75 mm, wheel brushes diameter 50 - 100 mm, end brushes and cylinder brushes.

Stainless Steel Brushes

Information on working on stainless steel you find at www.lessmann.com

Attractive assortment

Coarse and fine steel wire, brass wire and abrasive filaments are available as filling materials.

The brushes are packed in small display cartons, 10 pieces per carton.

We offer different packaging to present these and other common brushes with shanks in specialist shops.

Item Nos. in bold are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

Packing and Sales Promotion

Brushes with blister packing
All standard brushes for drilling machines and angle grinders are available with blister packing. The blister packing is available with attractive labels with information about technical data and EAN-bar code. The clam shells emphasize the brushes' value, protect them and provide good visible presentation.

On request we can arrange your individual private label solution.

The most demanded tool brushes are not only offered single or bulk packed. These fast sellers are presented even better in sale promoting display cartons. They can be put on tool shelves or on the counter.

- The standard assortment contains:
- Knot cup brushes diameter 65
 - Knot wheel brushes diameter 115
 - Knot bevel brushes diameter 100
 - Cup brushes with crimped wire diameter 60

A display carton with the best selling Do It Yourself Brushes, bulk packed, completes the offer.

Item Nos. in bold are available ex stock.
Consider our minimum order value for *italic printed* article numbers (see page 148).

Presentation for tube brushes
With this practical hanger assembly from now on also tube brushes with thread can be presented on self-service walls in the retail market.
The hangers are available in M 6, M 10, W 3/8" and W 1/2". All hangers are with a eurohole.
A label can be fixed at the front of the hanger.

Sales Promotion

Professionalism, service, quality...

The LESSMANN Display units will make a good impression on your customers. They are not only good for your image but will also have a positive effect on promoting and increasing your brush sales. The comprehensive and at the same time clear presentation makes the customers choice much easier.

Take advantage of our experience and use this possibility that will lead to successful increased sales. Beside your special demands the most important thing to know is the branch where your most important customers come from and what their demands are. We have tried and tested variations of assortments for different kind of constellation. Please do not hesitate to contact us and we will arrange your individual programme. Because the production of high quality brushes is as important as having success with our products!

1 | Self-service Wall 100 x 220 cm

The most effective sales promotion for your LESSMANN brush assortment. Available with LESSMANN logo or Brush-Know-how label.

2 | Individual mix for Success

Products that fit in with the wishes of your (most important) customers and their main demand, arranged together with you and your customers. Your assortment can mainly consist of technical brushes or hand brushes.

3 | Carton Packing

All brushes for angle grinders in sales promoting single packing – stable and safe.

4 | Hand Brushes with EAN Code

All standard hand brushes (article no. 10x.xxx) with EAN code. Without extra charges for you!

5 | Display boxes for Shank Brushes

Available as a standard for all shank wheel brushes, cup brushes and end brushes with shank.

6 | Brush-Know-how Flyer

The most important brush applications of our brush assortment in length DIN with technical information and hints!

7 | Hanger Assembly for tube brushes

With this hanger with euro hole, brushes with thread can be presented.

8 | Cut Cases

Cut Cases for an easy solution of presenting products in large quantities.

We will help you with the right choice of shelf

On request we can arrange the right shelf solution for presenting your brushes!

Small self-service wall

A suitable alternative solution: A practical self-service wall with the measurements 67 x 180 cm.

Little helps for orientation (labels)

They give hints regarding brushes and their application. Available for following article groups: Hand brushes, brushes for drilling machines and brushes for angle grinders.

Brush-Know-how Poster

All important brush applications at first glance! Available as label 100 x 40 cm and as poster 40 x 60 cm. Ask us or our representatives!

Private Label

A good idea with different solution possibilities. Ask for your own brand!

Sales promoting blister packing

For all drilling machines and angle grinders.

Take a look at quality

All technical data and safety information as well as observation windows for recognising the brushes (e.g. green marking for stainless steel brushes).

Stainless Steel Marking

LESSMANN brushes with stainless steel wire can easily be recognised by green cups or side plates.

Brush-Know-how flyer

The most important brush application of our brush assortment in length DIN with technical information and hints!

Order now:

German version: Art.-No. 99BKHDEU

English version: Art.-No. 99BKHENG

Cut Cases

Cut Cases for an easy solution of presenting products in large quantities.

Brushes with carbon fibre

Brushes with carbon fibre for electro-chemical cleaning

To use in machines for cleaning weld seams

Due to oxidation on stainless steel surfaces temper colour is a result from heating. Hence often a post-treatment of the surface is necessary to reestablish the original character. End brushes with carbon fibres are used in special machines for cleaning weld seams. The typical electrochemical jobs are the following:

Cleaning

To remove tapering colour and scales on stainless steel surfaces, e.g. on weld seams.

Polishing

For polishing stainless steel surfaces. Residues can be removed with end brushes.

Marking

With special patterns surfaces can be marked permanently by the electrochemical process.

Electroplating / Surfacing

Due to the use of the end brushes, different coatings can be put on the surfaces or they can be refined.

Cleaning of areas which are hard to reach

Before the treatment | After the treatment
Cleaning of weld seams

End brushes for standard machines

For many customary available machines for weld seam treatment LESSMANN offers the suitable end brushes.

Depending on the customers' demands the end brushes are available with different adapters, e.g. interior / exterior threads.

Time-saving and effective

Unlike other processes, working with special machines for weld seam cleaning are environmentally friendly and by using it correctly no toxic vapours are generated.

Due to the high flexibility of the filament also areas which are hard to reach can be treated easily.

By using LESSMANN brushes within a short time a clean result is achieved. Weld seams are treated without any residues and surfaces are treated without being damaged.

High Performance Filament Brush

HFB Disc Brushes

LESSMANN high performance surface finishing tools achieve excellent deburrings and edge radiusing on exterior and interior areas of work pieces. Next to the applications in machining centers, especially in linear deburring and finishing lines with planetary brush systems HFB brushes obtain high efficiency.

They are used for e.g. for the deburring of

- blanked parts
- sintered parts
- hydraulic and pneumatic work pieces
- aluminium work pieces
- and many more

Also work pieces which are exposed to high pressures demand precise egde radiuses. LESSMANN HFB brushes are ideal tools which achieve these requirements outstandingly.

In a special production process LESSMANN HFB brushes are manufactured with a very high filling density. Available are high abrasive nylons with silicon carbide, ceramic or diamond grit.

Due to the application orientated selection of the filling materials an excellent deburring and constant edge radiusing in a short working time is achieved. Depending on the application HFB brushes can be used under dry or wet conditions.

Typically in LESSMANN HFB Brushes high quality filling material is used. It is very bending resistant and low-abrasion, besides it is very appropriate for working under wet conditions.

Depending on the requirements the brushes can be produced with individual filling fields. Full filament but also a fragmentation in pre-defined fields or a deviation of the bristles is possible.

On the customer's demand LESSMANN produces brushes for all machine brands. Our basic executions suitable for all common machines are deliverable within short-term. Please contact us for further information!

Typical work pieces which are treated with LESSMANN HFB brushes.

LESSMANN Adapters

(Square and Hexagonal).

Delivery includes 1 aluminium plate, 1 disc, 2 hex nuts.

On request we produce the brushes referred to your hole pattern. For this purpose please send us a drawing with measurements.

** For the treatment of ductile or strong materials and when using high peripheral speeds a stabilization sleeve can be mounted. It causes a better stabilization and prevents a disperse of the filling material.

Item Nos. in bold are available ex stock. Consider our minimum order value for italic printed article numbers (see page 148).

SIC = silicon carbide bristles

Staple Set Brushes

Staple Set Brushes

For applications with little mechanic load, brushes in a staple set edition are produced. Typical applications for staple set Wheel Brushes and Wide Face Brushes, Disc Brushes or Lath Brushes are for example cleaning, deburring, surface finishing, structurizing, smoothing, transporting, sorting or moistening.

Depending on the requirements, the filling material can be fixed individually into the body. The distance of the bundles are variable and comply with the application.

As filling material next to different wires also fibres are available. Also mixed filament in various mixing proportions are possible. Disc Brushes usually are delivered with thread or bore.

Staple set wheel and roller brushes are produced with bore or arbour absorption, depending on the customers' specification.

Please inform yourself on the following pages and do not hesitate to contact us for personal advice!

Possible desities of brush filling material
for Wheel Brushes and Wide Face Brushes, Disc Brushes and Lath Brushes

Possible placement of brush filling material
for Wheel Brushes and Wide Face Brushes, Disc Brushes and Lath Brushes

Disc Brushes

Disc Brushes – Measurements

10 - 800	10 - 100	8 - 95 steel 8 - 135 Plastic					

Disc Brushes – for cleaning and deburring industry

Disc Brushes are used for the treatment of plane surfaces on almost every material. The numerous variations of body and trimming materials and adapter systems make them for all purposes applicable.

For deburring working pieces, disc brushes can be inserted in individual equipments as well as in machining centres for removing secondary burrs.

Disc Brushes for the wood machining industry

Disc brushes used for the wood machining industry have a very long filling material (SIC). Used on angle grinders, the disc brushes are ideal for maintaining, cleaning, structurizing or polishing wood.

The brushes are very effective when working on large surfaces.

Circular Discs – Standard Body

If your application allows the mentioned sizes, we recommend our standard bodies.

The inquiry form for disc brushes you find on page 137 or at www.lessmann.com

Lath Brushes

Lath Brushes work in machines and are used for clearing, cleaning, insulating and discharging electric charges etc. Various body materials are possible: including wood and plastic.

The filling material can be manifold and goes from fine horsehair to firm steel wire. Through the deviation of the bristles until 35° the lath bushes are very flexible in their applications.

As required the stocked standard bodies could be reworked (turned, drilled out) to get further dimensions

Item Nos. in bold are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

Staple Set Wheel and Roller Brushes

These brushes are used for cleaning, deburring, surface finishing, structurizing, smoothing and transporting. The brush body is of wood or plastic. The filling material is determined by the brushes purpose. Please also consider temperature, chemical and mechanical characteristics during use. Filling lenght, filling material, filling diameter and filling density are significant for the mode of action of the brush. The density of the filling material can be varied by the diameter and the distance of and from the hole. The staple set wheel and roller brushes are available with bore or arbor absorption, depending on the customers' specification. The mentioned data in the chart should support you defining the right brush for your application. For further information or support do not hesitate to contact us by e-mail, phone or fax. We will be very pleased to support you.

Note:

For applications which have a high mechanical load on the brushes we advise our wheel and roller brushes with crimped or knotted wire (page 47).

As required the stocked standard bodies could be reworked (turned, drilled out) to et further dimensions

- Item Nos. in bold are available ex stock.

Strip Brushes

Strip Brushes

Strip brushes are mainly used as cover in association with moving parts. They insulate doors and windows or help to keep moving parts on machines clean. There are many forms and profiles, with or without holders. Therefore, please indicate full measurements and holder details when ordering. The profile can be made of steel, aluminium or plastic. The filling material can be bristles or steel wire.

Brushes for deburring machines

Special Strip Brushes as component part of deburring machines.

The inquiry form for strip brushes you find at www.lessmann.com

Required measurements and data:

- GH total height
- BH filling length
- RB back width
- shape of fixing

Filling Material:

STA, STM, MES, ROF, PP, PE, PA, FIB, ROS

Item Nos. in bold are available ex stock. Consider our minimum order value for *italic printed* article numbers (see page 148).

- STA = steel wire
- STM = brass coated steel
- ROF = stainless steel wire
- MES = brass wire
- PP = polypropylene
- PA = polyamide
- PE = polyethylene
- FIB = fibre
- ROS = horse hair

More information...

... found on our homepage!
www.lessmann.com

Beside the variety of languages (german, english, spanish, czech, turkish and russian) we also provide you with useful information.

For example you can download:

- the complete article-number-catalogue-side-index
- enquiry forms of the different special brushes
- notes regarding the filling materials e. g. tables of the chemical and physical characteristics
- our brochure "Brush-Know-How"
- safety and operating instructions
- ISO 9001 certificate
- general terms and conditions

Please also ask for our special leaflets:

- Deburring with Brushes
Art. No. 99EBENG
- Interior Brushes / Miniature Brushes
Art. No. 99INBENG
- Disc Brushes
Art. No. 99TBDEUENG
- Brush Know How
Technical Advice
Art. No. 99BKHENG

THE GERMAN **BRUSH** COMPANY

LESSMANN®

www.lessmann.com

More than 10.000 solutions ...

As a constantly developing and producing specialist we are able to produce special brush models in both small and large series production runs. This is brought about by our own engineering, tool, and equipment building department in association with our modern machine facilities.
